

Match Stick Mason Jar for Kindermarket

Materials Needed:

- Match Boxes (Universal matches work the best. If not – ‘Strike On Box’ kitchen matches will work too)
- Small Mason Jar
- Sandpaper
- Hot Glue
- Ribbon – Optional

Instructions:

- Cut sandpaper in a circle shape, size of the inner Mason jar’s lid
- Glue sandpaper circle on top of the inner lid
- Cut off the side stripe of your matchbox and glue it in the middle of the sandpaper lid
Side Note – if you’re working with ‘Strike On Box’ kitchen matches – they will not strike on any other surface, such as sandpaper, except their matchbox side. We want to use both sandpaper and matchbox stripe, so people could use both options.
- Put the matches inside of Mason jar and close the lid
- See picture for guidance

Optional:

- Tie the ribbon around the Mason Jar

Thank you for volunteering!
